INSIDE FLAP • KEEPER HABITS

4 Keys to Long-Term Health

Small Daily Habits That Prevent 95% of Vet Visits

Wet Hands or Gloves!

They tolerate brief handling way better than Dart Frogs, but human hand oils and soap still sting their skin. Rinse your hands in dechlorinated water (or wear nitrile gloves) before picking them up!

Skip Heavy Misting!

Keeping a White's Tree Frog in a soggy, unventilated 90% humidity tank causes bacterial skin infections (little neon green spots). Keep the screen top open and let the water bowl do the hydrating!

The Morning Bowl Scrub

Every single night, your frog will sit in its water bowl like a hot tub — and promptly poop in it! Dump, scrub with hot water, and refill with fresh dechlorinated water every morning.

Thick Branches Only

Full-grown Dumpies are heavy! Give them thick cork branches, horizontal bamboo bars, and magnetic frog ledges rather than skinny twigs.

Daily Color-Change Quirk: Don't freak out if your green or teal White's Tree Frog looks chocolate-brown at noon and bright mint-teal at 8 PM! All White's Tree Frogs (classic green, blue-phase, and white-flecked 'Snowflake' morphs) change shades daily based on temperature, mood, and lighting.

Grab-and-Go Setup Checklist

TALL SCREEN-TOP TANK & PERCHES

- [ ] 18"×18"×24" or 24"×18"×24" Tall Screen-Top Glass Terrarium
- [ ] Thick Cork Bark Branches, Horizontal Bars & Sturdy Vines
- [ ] Reptile Soil + Thick Blanket of Sea Grape / Magnolia Leaves

GENTLE HEAT, GAUGES & HOT-TUB BOWL

- [ ] 25W–50W Daytime Basking Bulb + Small Dome on Thermostat
- [ ] Optional: Low-Output 5%–7% Shade UVB + Plant LED
- [ ] Digital Thermometer & Hygrometer Gauge
- [ ] Wide, Heavy Shallow Soaking Bowl + Water Dechlorinator

LIVE BUGS & SUPPLEMENTS

- [ ] Live Crickets, Dubia Roaches & Nightcrawlers / Hornworms
- [ ] Pure Calcium (No D3) & Calcium (With D3)
- [ ] Amphibian Multivitamin (with Preformed Vitamin A) + Bug Gut-Load
- [ ] Rubber-Tipped Feeding Tongs & Smooth Bug Dish

Critter Cabana & Cascade Pet Supply

Questions about heating, shedding, or a picky eater? Stop by or call our reptile team anytime — we're here for the full 15–20+ year commitment!

CRITTER CABANA & CASCADE PET SUPPLY • CARE GUIDE

White's Tree Frog

Litoria (Ranoidea) caerulea

The Quick Version: Everyone calls them 'Dumpy Tree Frogs' because they're delightfully chubby and have a permanent sleepy smile! Even better, these Australian frogs have a natural waxy skin coat that likes **way drier air (50–60% RH)** than tropical frogs — and they're the boldest, funniest frogs you'll ever meet!

QUICK VITAL STATS AT-A-GLANCE

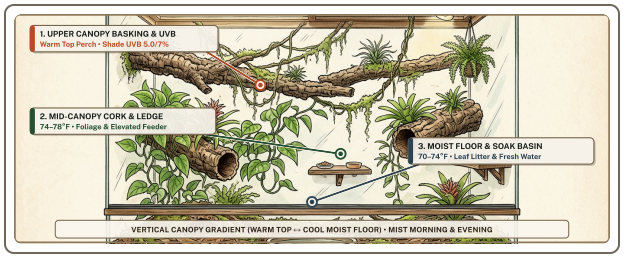

LIFESPAN **15–20+ Years**	ADULT SIZE **3.5–4.5 Inches**
ACTIVE HOURS **Night (Nocturnal)**	ADULT TANK **18×18×24"+ Tall**
HUMIDITY **50–65% RH (Not Wet!)**	

OPEN FOR TANK SETUP, TEMPS, FEEDING & SHOPPING LIST →

STEP 1 • HABITAT & CLIMATE

Tall Perches, Open Airflow & Nightly Hot Tub Bowl

Big Rule: Don't Over-Mist! They Need an Open Screen Top & 50–65% Humidity!

Top Branch Warm Spot
Gentle low-wattage bulb over the highest perch — **82°–85°F**

Daytime Tank Air
Warm at the top, cooler down by the floor — **75°–80°F**

Keep Air Breezy (50–65%)
Stagnant 85%+ humidity gives them bacterial skin spots! — **50–65% RH**

Soaking Bowl Water
Dump and refill with dechlorinated water every morning! — **0% Chlorine**

Nighttime Temp Drop
Lights off at night — **68°–74°F**

Thermostat & Gauge Rule: Stick-on dial gauges can be off by 10°F+! Use a digital probe thermometer/hygrometer and always plug heating mats and heat emitters into a **digital thermostat**.

STEP 2 • STOCKED STORE OPTIONS

Two Ways That Work

Pick Option A or Option B Based on Your Home Setup

Flooring: Leaf Blanket / Frog Foam vs. Bowl Feeding

White's Tree Frogs tackle bugs like linebackers — so you don't want them swallowing mouthfuls of loose bark!

OPTION A: THICK LEAF LITTER OVER SOIL (OR WASHABLE FROG FOAM)
Cover moist reptile soil with a thick 2" layer of big Magnolia or Sea Grape leaves (or use a fitted frog-foam mat) so dirt never sticks to their tongue.

OPTION B: TONG-FEEDING OR ESCAPE-PROOF BUG BOWL
Handing them bugs with rubber-tipped tongs or dropping roaches/worms in a smooth glass bowl keeps every bite clean.

Low-Output UVB vs. Calcium + D3 Dust

Even though they hunt at night, they often snooze out in the open on top branches during the day:

OPTION A: 5%–6% SHADE UVB OVER THE TOP BRANCH
Great for strong bones and makes their mint-green, teal-blue, or white-speckled morph colors pop!

OPTION B: LED LIGHT + SCHEDULED CALCIUM W/ D3 DUSTING
Works great as long as you stay on top of dusting their bugs with Calcium + D3 and an Amphibian Vitamin A supplement.

Solo Frog vs. Frog Squad (Watch Size Differences!)

White's Tree Frogs love hanging out in a pile together — with one huge rule:

OPTION A: SINGLE FROG IN AN 18"×18"×24" TALL TANK
Super easy to track how many crickets they're eating.

OPTION B: 2–3 FROGS OF THE EXACT SAME BODY SIZE (24"×18"×24"+)
Big No-No: never put a big adult with a little baby! White's Tree Frogs have zero filter — if a smaller frog fits in their mouth, they will eat their roommate!

STEP 3 • DIET & NUTRITION

Feeding Guide (Warning: They Will Beg Like Dogs!)

Watch Their Portions: Adults Will Happily Eat Until They Turn Into Baseballs!

Babies — Feed Daily
4–6 Gut-Loaded Crickets or Small Dubia Roaches: Dust with Calcium at almost every meal and an Amphibian Multivitamin w/ Vitamin A once a week.

Sub-Adults — Every Other Day
4–6 Medium Crickets, Roaches, or Earthworms (3–4×/Week): Dust with Calcium 2×/week and Multivitamin 1×/week.

Adults — 2–3× Per Week
3–5 Bugs Per Meal: Don't fall for their begging faces! You want a subtle ridge above their eyes, not heavy fat rolls hanging over their eyeballs.

Favorite Dumpy Frog Bugs:

- **Banded Crickets:** Gets them hopping & exercising at night
- **Dubia Roaches:** Awesome lean protein in a smooth bug bowl
- **Nightcrawlers & Hornworms:** Soft, juicy favorites (expect happy frog lunges!)
- **Go Easy on Waxworms:** Super fatty — save for a rare birthday treat!

First-Week Rule: Give your new White's Tree Frog **5 to 7 days of peace and quiet** in its new tank before handling or offering its very first meal so it can map out its hides and feel safe!
